

**IN THE CLAIMS**

Please amend the claims as follows:

1. (Currently Amended) A mobile communications terminal, comprising:
  - a storage for storing a database of schedule data including data relating to time of day;
  - a display for displaying selected information from said database, the display communicatively coupled to the storage; and
  - a time reference for providing current time of day information, wherein the displayed selected information is variable dependent on the current time of day information;

wherein the selected information is displayed as a sequential list that scrolls in response to a change in said the current time of day information, and the current time of day information is displayed in a graphical and non-textual format by [[an]] a positional indicator shown relative to said the sequential list.
2. (Canceled)
3. (Original) The terminal according to claim 1, wherein the display is arranged to indicate which of the displayed selected information corresponds to the current time of day information.
4. (Currently Amended) The terminal according to claim 1, further comprising a user input device arranged to allow input of said the schedule data.

5. (Currently Amended) A mobile communications terminal, comprising:
  - a memory storing a database of schedule data including data relating to time of day;
  - a display communicatively connected to the memory and used for displaying a list of at least two of said the schedule data and a time of day indicator;
  - a digital signal processing device providing current time of day information, wherein said the time of day indicator is associated on the display with one of said the at least two displayed schedule data coincident with said the current time of day information; and

wherein the time of day indicator is graphical and non-textual, and a position of the time of day indicator relative to said the one of said the at least two displayed schedule data is variable in accordance with the current time of day information and the duration of said item the one of said the at least two displayed schedule data.

6. (Canceled)

7. (Currently Amended) A method of displaying schedule data relating to time of day on a mobile communications terminal, comprising:
  - storing a database of schedule data including data relating to time of day;
  - reading current time of day information;
  - selecting information from said the database according to said the current time of day information; and

displaying ~~said~~ the selected information and the current time of day information;  
wherein

the selected information is displayed as a sequential list that scrolls in  
response to a change in the current time of day information, and

the current time of day information is displayed in a graphical and non-  
textual format by a positional indicator shown relative to ~~said~~ the sequential list.;

~~wherein the selected information is displayed as a sequential list which scrolls in  
response to a change in current time of day information.~~

8. (Canceled)

9. (Original) The method according to claim 7, wherein the display indicates  
which of the displayed selected information corresponds to the current time of day  
information.

10. (Currently Amended) The method according to claim 7, including receiving  
~~said~~ the schedule data as input from a user input device.

11. (Canceled)

12. (Currently Amended) A method of displaying schedule data relating to time of  
day on a mobile communications terminal, including:

a. storing a database of schedule data including data relating to time of day;

- b. reading current time of day information; and
- c. displaying a list of at least two of ~~said~~ the schedule data and a time of day indicator associated with one of ~~said~~ the at least two displayed schedule data coincident with the current time of day information;  
wherein the time of day indicator is graphical and non-textual, and a position of the time of day indicator relative to ~~said~~ the one of ~~said~~ the at least two displayed schedule data is variable in accordance with the current time of day information and the duration of ~~said item~~ the one of ~~said~~ the at least two displayed schedule data.

13.-15. (Canceled)
